

DISCRAFT

GEAR 2017

The World Leader in Disc Sports

We were captivated by the flying disc craze of the 1970's. To interact with a spinning disc and watch it fly is truly a beautiful thing. Our frustration at the time was over the quality of the discs that were available; flight patterns were inconsistent, distance potential was low, and the quality in general was poor. Those discs were manufactured to be toys, and we wanted high performance sports equipment to keep up with the increasing skills of the players.

In 1978 we launched Discraft to serve disc sports athletes.

Performance Sportdiscs™ For All Levels of Play

Over 35 years later, Discraft continues to build on a rock-solid reputation for quality and consistency. Using engineering grade polymers and precision craftsmanship, Discraft continues to create sportdiscs™ in the USA for players of all skill levels.

Made by Athletes, for Athletes

Much of our product line is devoted to the diverse needs of disc golfers, and everyone from beginners to World Champions will find discs perfectly suited to lower their scores. For Ultimate there is no better choice than the 175 UltraStar™, used by millions players around the globe as the official disc of USA Ultimate and many other governing bodies for the sport. And the Freestyle Players Association calls the Discraft Sky-Style™ "the best Freestyle disc ever made."

We invite you to join us: grab a disc, get outside and get airborne!

disc selection BASICS

GOLF DISC BASICS

WHY SO MANY MODELS?

Like ball golf clubs, golf discs are designed to produce a variety of flight paths within a variety of playing conditions. Some are designed for maximum distance, some to turn left or right, some are better into a headwind, some are used for controlled short shots, and so on.

WHAT TO LOOK FOR: STABILITY

Each Discraft disc is rated for stability. At the far end of this scale is a stability rating of 3.0, which indicates a very overstable and difficult to control disc. Discs with a high stability rating will have a tendency to 'hyzer,' and you may find it challenging to keep them flying straight. New players should focus on discs with lower ratings of 1.0 or less. More info on stability ratings can be found on page 14.

WHAT TO LOOK FOR: WEIGHT

The weight of a golf disc can also affect its stability. The rule of thumb is: a heavier version of any given disc will tend to be slightly more overstable than a lighter version of the same disc. Many of the pro golfers on Team Discraft throw the heaviest discs available. That's fine for experienced pros, but you may want to start with some lighter weights in the 160 gram range or below.

WHAT ARE THE BEST GOLF DISCS TO START WITH?

Different discs are better suited to different players. A youth under 14 might be better with a putter, while an athletic college student could probably start with a moderate driver.

When in doubt, any player will benefit from throwing the Discraft Buzzz midrange. To put it simply, Buzzz is the best golf disc you can buy. It is easy to control and now the most popular disc in the sport.

The Discraft Beginner Golf Sets include everything a new player needs. The deluxe set includes a putter, midrange, two distance drivers and a disc golf bag.

CATCH & THROW

WHICH SHOULD I CHOOSE?

All three of our Sportdisc 'lids' are excellent for general catch & throw purposes.

ULTRASTAR 175 GRAM (PAGE 7)

This disc has set the standard for Ultimate. Consistent, dependable, and heavy enough for long flights to the end zone, even in wind.

SKY-STYLER 160 GRAM (PAGE 8)

Best for freestyle. At 160 grams it is the perfect weight for brushing and guiding.

J*STAR 145 GRAM (PAGE 6)

The original youth disc of USA Ultimate. Just like its big brother the Ultra-Star, but smaller and lighter. Fun and easy to throw.

← Mr. Popular →

DISCRAFT
THRASHER
DISTANCE DRIVER 0.4

THRASHER DISTANCE DRIVER

Thrasher is the new super quick distance driver that delivers huge shots for slower arms while still being completely big arm friendly.

DISCRAFT
MINI BUZZZ

MINI BUZZZ

Mini Buzzz has taken the world by storm. At approximately 62 grams and about six inches across, it's larger and heavier than your standard mini. Looks awesome, flies great and always provides a ton of fun!

JAW-BREAKER
PLASTIC

JAWBREAKER PLASTIC BLEND

Disc golf's grippiest new plastic blend is super tacky and has a completely unique look. Perfect for putters... give 'em a squeak!

ULTIMATE

WHAT IS ULTIMATE?

FAST-PACED NON-CONTACT FIELD TEAM SPORT

Ultimate combines the non-stop movement and athletic endurance of soccer with the aerial passing skills of football. Self-officiated sportsmanship is highly emphasized, and is known as the Spirit of the Game. A game is played by two seven-player squads on a field similar to football. The object of the game is to score by catching a pass in the opponent's end zone. The disc may be advanced only by completing a pass to a teammate. A team may throw as many passes as they wish and possession is retained as long as the disc is in the air -- although the thrower has only ten seconds to release a pass.

GAME OFFERS CONSTANT CHANGE OF PACE

All turnovers result in an immediate change of possession and a change of direction of play. Games are generally played to 15 points. Each point begins with a 'pull' from end zone to end zone and teams switch ends after scoring.

OVER FIVE MILLION PLAYERS IN 40+ COUNTRIES

Ultimate is now played in over 40 countries at many competitive levels, from casual summer leagues to national teams and two US pro leagues. Over 4.8 million athletes report annual play in the U.S. alone¹, and over 1400 teams compete annually in the USA Ultimate Championship Series. (¹Sports & Fitness Industry Association, 2012)

ULTRASTAR MINI

The littlest version of the venerable UltraStar. Flies great, looks cool. Not recommended for really fun but irresponsible impromptu Ultimate games in hotel hallways and other indoor public spaces. ;-). Available in stock SuperColor designs or your own custom creations.

J*STAR 145

CLASS: JR ULTIMATE WORLD STANDARD

DIAMETER 9.50" WEIGHT 145

The J*Star is the official youth Ultimate disc for ages 12 and under. Smaller and lighter than its big brother the Ultra-Star, it is easier for developing players to catch, throw and get better distance.

ULTRASTAR 175

CLASS: ULTIMATE WORLD STANDARD

DIAMETER 10.75" WEIGHT 175

Official disc of USA Ultimate since 1991

The world standard for the sport of Ultimate. With its contoured grip and aerodynamic engineering, UltraStar has set the standard for quality, consistency and performance since its introduction in 1981.

If your game is Ultimate, your disc is UltraStar.

CUSTOMIZE YOUR DISCS

FOR LEAGUES, TEAMS, TOURNAMENTS & CORPORATE EVENTS

Show your true colors: make your discs as cool and unique as you are with custom design options from Discraft. Available on a wide range of golf and sportdiscs.

SUPERCOLOR

Now you can put lush, full color designs on Ultrastar, Ministar and Buzzz discs with our exclusive SuperColor process. From photos to stunning graphics, SuperColor discs are a promotional MUST HAVE for all corporate groups, events and others who want to associate their logos and designs with quality and fun!

NEW: ULTRASTAR CENTER PRINTING

USAU championship approved! Your custom SuperColor design printed on the center of your UltraStars, leaving the flight rings "pure."

HOT STAMPING

Custom hot stamp printing uses a heated pressure system to embed brightly colored foils onto the disc. This is the most economical choice for custom designs, and is available on nearly all of our discs and lines. Hot stamping also requires the most stringent design standards.

Minimum purchase required for all custom orders. Please carefully read design specifications before creating your artwork. Call or visit discraft.com for details.

WHAT IS

DISC GOLF?

Like Traditional "Ball" Golf Played With a Disc

Disc golf is a lot like traditional "ball" golf, except players use specially made plastic flying discs instead of balls and clubs, and throw them for 'par' at an above-ground target instead of a hole in the ground. There are different types of discs used for different purposes, much like ball golfers use different clubs.

Players Start by Teeing Off, Finish by Landing in Target

The object of the game is to throw a golf disc into the basket (a steel basket over which chains hang), in the fewest throws. The player begins by 'driving' from a designated tee area and continues toward the target, throwing each consecutive shot from the spot where the previous throw landed. Finally, a successful 'putt' sends the disc into the target. The most satisfying sound a disc golfer can hear is the 'ching!' of a disc crashing the chains before dropping into the basket.

Courses Vary in Length and Terrain

Most disc golf courses consist of 18 or 24 holes, and you'll find some nine-hole courses too. Hole lengths vary, but generally fall between 150 and 500 feet each. Trees, shrubbery, water and terrain changes offer plenty of hazards to avoid, and it becomes very possible to lose a disc in areas with thick growth, tall trees or (SPLASH!) deep water. Fortunately, at retail prices between \$9 and \$20, lost discs are more easily replaced than your typical nine-iron.

Easy on the Environment, Inexpensive, and Fun

Disc golf offers many of the same pleasures as ball golf: fresh air in a beautiful landscape, the camaraderie of friends, and the challenge and excitement of combining personal skill and speed to project an object toward a target. In addition, disc golfers can feel better about themselves and their environment, knowing that chemical pollutants and vast amounts of fresh water aren't being used to keep their playing fields looking good, nor do acres of trees need to be clear-cut or wetlands filled in, as is sometimes the case for too many ball golf courses. And perhaps best of all, disc golf is inexpensive. The only equipment you need is a flying disc, and most courses are located in municipal parks, which admit players for free or a minimal fee for daily or yearly access.

Golf Discs Make Playing More Fun

Don't expect to see many freestyle discs out on the course. These discs fly great, but can't deliver the distance you'll want for driving. On the other hand, the sharper edges of a golf disc are useless for a game of catch! The game draws a friendly crowd of 500,000 regular players who welcome and encourage new players. Traditionally dominated by 18 to 54-year-old males, the field of disc golf players has expanded greatly in recent years to include many women and families. Kids love it, it's a cheap date and a great excuse to get a little outdoor exercise. Bottom line: disc golf can be big fun for everyone regardless of age, gender or economic status.

Standard Classes of Golf Discs

	Driver	The sharper edge makes a driver built for speed.
	Midrange	Less distance than a driver, but more control.
	Putter	For slow and highly controlled flights to the basket.

DISCRAFT

disc golf PLASTICS

THE DIFFERENCES BETWEEN DISCRAFT'S

GOLF PLASTIC BLENDS

 <p>durability </p> <p>grip </p>	A NEW CLASS OF PERFORMANCE Discraft has combined pro durability and performance with a unique visual appeal that sets the bar at a new level for disc golf athletes who demand nothing less than the best.
 <p>durability </p> <p>grip </p>	TOUGH AND ULTRA-GRIPPPY Making its debut in 2006, ESP plastic is the new standard for grippy durability. It is specifically engineered for superb responsiveness to the needs of the most demanding disc golfers.
 <p>durability </p> <p>grip </p>	OUR BEST ALL WEATHER PLASTIC It doesn't get any more flexible than our FLX line of plastic, which is a special Z blend. Designed as a cold weather alternative to firmer plastics, Z FLX is a great choice in all weather conditions.
 <p>durability </p> <p>grip </p>	OUR TOUGHEST GOLF PLASTIC Discraft's Z line is a favorite with experienced players, since the hard Z plastic can retain its "seasoning" for years and years of reliable predictability and performance.
 <p>durability </p> <p>grip </p>	LIGHTWEIGHT DURABILITY A unique and superior lightweight blend that offers weights as low as 140 grams and holds up to abuse much better than the competition. You'll be amazed at the extra distance. Some Z Lite models float too!
 <p>durability </p> <p>grip </p>	PERFECT FOR PUTTERS The cool, unique look of Jawbreaker plastic disguises an even more impressive characteristic: the grip is incredible! Give one a squeak and see if you don't agree it's a putter's best friend.
 <p>durability </p> <p>grip </p>	GREAT GRIP, EVEN WHEN WET Discraft's quest for durability started with our X line. This plastic is highly grippable, even when wet, offers great distance and consistent flights. Grip it and rip it!
 <p>durability </p> <p>grip </p>	VALUE AND QUALITY Discraft's Pro D plastic is the choice of beginners alike for its consistent feel, seasoning speed and bright colors. If great grip at a value price is most important to you, you'll be impressed!

DISCRAFT

STABILITY RATING SYSTEM

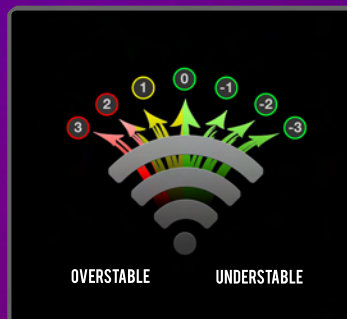

Chart indicates ratings for right handed, backhand throws at moderate to high speeds. Reverse chart for right handed forehand shots or left handed backhand throws.

- 1.5** Disc turns moderately hard left
- 0** Disc flies flat and straight
- 1** Disc will hold a slow right turn

DISC GOLF FLIGHT GUIDE

Why do some discs fly left, and others go right? Like clubs in ball golf, Discraft golf discs are designed to travel a variety of flight paths to meet any course challenge. We define a disc's flight characteristics through the term STABILITY.

Let's assume you are a right handed, backhand thrower. If you throw a disc and it continues straight, that disc is called stable. A disc that fades left is overstable, a right fade is understable.

Each Discraft disc is marked with a number from -3 to +3. The lower the number, the more understable the disc will fly. The higher the number, the more overstable the disc will fly.

CRANK

CLASS: DISTANCE DRIVER

STABILITY 1.3

MAX WT 174

Crank is the fastest, most controllable max distance golf driver you've ever thrown. If you've been struggling to improve your distance while maintaining accuracy, you haven't tried Crank.

FLX ESP Z X

CRANK SS

CLASS: DISTANCE DRIVER

STABILITY 0.7

MAX WT 174

Just because you don't have a lot of power, doesn't mean you don't deserve more distance! Crank SS was designed to deliver significantly more distance for low-power throwers. Fast and controllable with a comfortable grip.

Z Z

THRASHER

CLASS: DISTANCE DRIVER

STABILITY 1.7

MAX WT 174

It's very fast and understable but not flippy, allowing huge distance from slower arms yet is completely big arm friendly. It will finish on a slow hyzer in most situations, so expect some gloriously clean anhyzers with a mild finish.

FLX ESP Z X

UNDERTAKER

CLASS: DISTANCE DRIVER

STABILITY 1.4

MAX WT 174

This straight & versatile flier fills many needs for many different skill levels: it doesn't get flippy for power throwers, isn't hard to control for low-power players.

FLX ESP Z X

NUKE: More distance, more speed, less effort.
What will YOUR new personal distance record be?

NUKE SS

CLASS: DISTANCE DRIVER

STABILITY 1.0

MAX WT 174

The 'super straight' version of NUKE is more controllable at slower speeds, allowing developing players to get the distance of more advanced players without needing years of experience. Nearly as popular as original NUKE!

NUKE OS

CLASS: DISTANCE DRIVER

STABILITY 2.2

MAX WT 174

OS stands for overstable. It's big D for big arms: created for expert players and windy conditions. Rewards power throwers with insane distance potential. Will finish on a hyzer even in strong winds, and offers ultra-dependable consistency.

WEAPONS OF
MASS DISTANCE

FORCE

CLASS: DISTANCE DRIVER

STABILITY 2.0 MAX WT 174

If you've got the arm, we've got the disc. Force is beloved by big arms for consistency, wind-fighting ability and above all: BIG D. Pop one out and find out what your game is made of.

AVENGER SS

CLASS: DISTANCE DRIVER

STABILITY 0.5 MAX WT 174

Avenger SS is our current favorite to recommend to amateur players, combining long glide with ease of control. Throw it hard and flat for a slight fade to the right, then watch Avenger SS keep on gliding! Awesome for rollers too.

SURGE

CLASS: DISTANCE DRIVER

STABILITY 1.7 MAX WT 174

Surge is the whip. Our most popular and controllable max D driver for all conditions. Can handle moderate headwinds with no problem, wicked fast with a surprising amount of extra glide.

SURGE SS

CLASS: DISTANCE DRIVER

STABILITY 1.6 MAX WT 174

If you're still developing your arm speed, the super straight Surge SS can deliver the same distance as its big brother, yet is easier to control. The thing is a birdie machine!

THE WORLD LEADER IN DISC SPORTS

BIG FUN! LOW COST! YOUR COURSE!

UMEÅ, SWEDEN IS ONE OF HUNDREDS OF GLOBAL ACE RACE LOCATIONS. JOIN THE FUN!

FLICK

CLASS: DISTANCE DRIVER

STABILITY 2.5 MAX WT 174

Flick is flat, fast and overstable, making it excellent for forehand, overhand and distance drives. A high-performance wind warrior for strong arms and advanced players.

XL

CLASS: DISTANCE DRIVER

STABILITY 0.0 MAX WT 174

XL is one of the farthest flying discs ever made, and is hugely popular with both new and seasoned players. Easy to control, holds a sweet line on big throws. Former world distance record holder of 693 feet.

HEAT

CLASS: DISTANCE DRIVER

STABILITY 0.0 MAX WT 174

The 2014 Ace Race proto quickly caught fire with players for its control, glide and distance at slower arm speeds. It has a smaller rim for easier grip, and is a breakthrough in delivering improved distance for new and developing players.

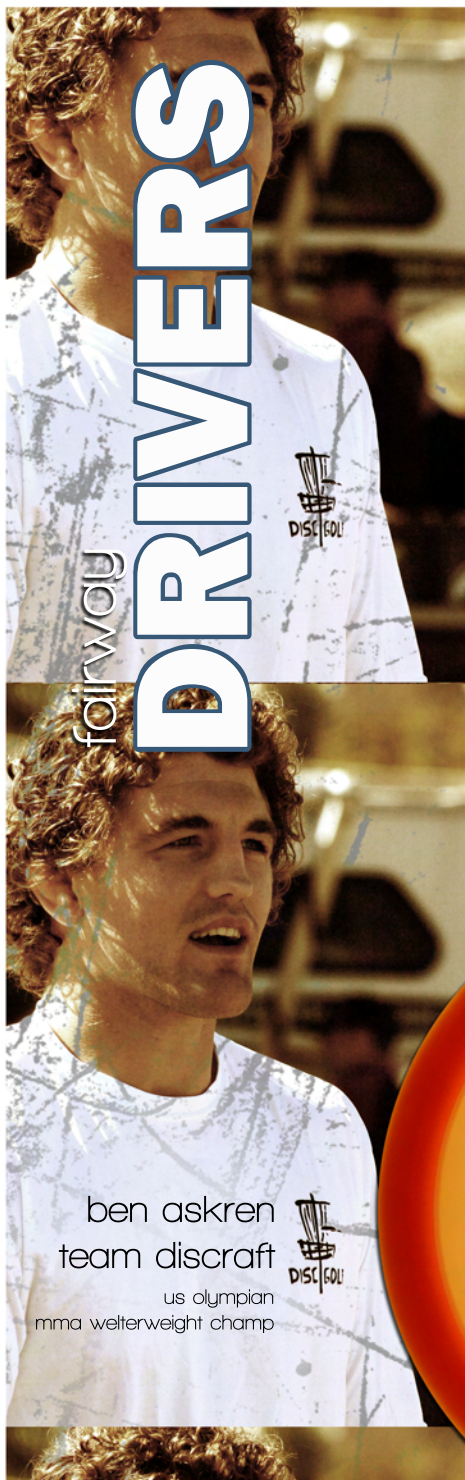

MANTIS

CLASS: DISTANCE DRIVER

STABILITY 0.8 MAX WT 178

The versatile Mantis™ is a utility driver for experienced players, and a distance driver for newer players. A touch of overstability enables control at slow or high speeds. Rip it hard for hyzer flips or hold a straight line at slower speeds.

fairway DRIVERS

ben askren
team discraft
us olympian
mma welterweight champ

DISCRAFT
fairway drivers

ZOMBEE

CLASS: FAIRWAY DRIVER

STABILITY 1.0 MAX WT 179

Zombie want CHAAAAINS! This utility driver has a stability rating of 1.0, making it easy to throw and control for the majority of disc golfers. Slow and relentlessly straight toward its prey, Zombee has become a huge player favorite.

STALKER

CLASS: FAIRWAY DRIVER

STABILITY 1.1 MAX WT 174

A runaway hit and now the #1 driver for average players. Dependably straight without getting flippy, Stalker is the utility driver that will keep you in the fairway. Controls like a Buzz on 'roids with a gentle finish for soft landings. Money!

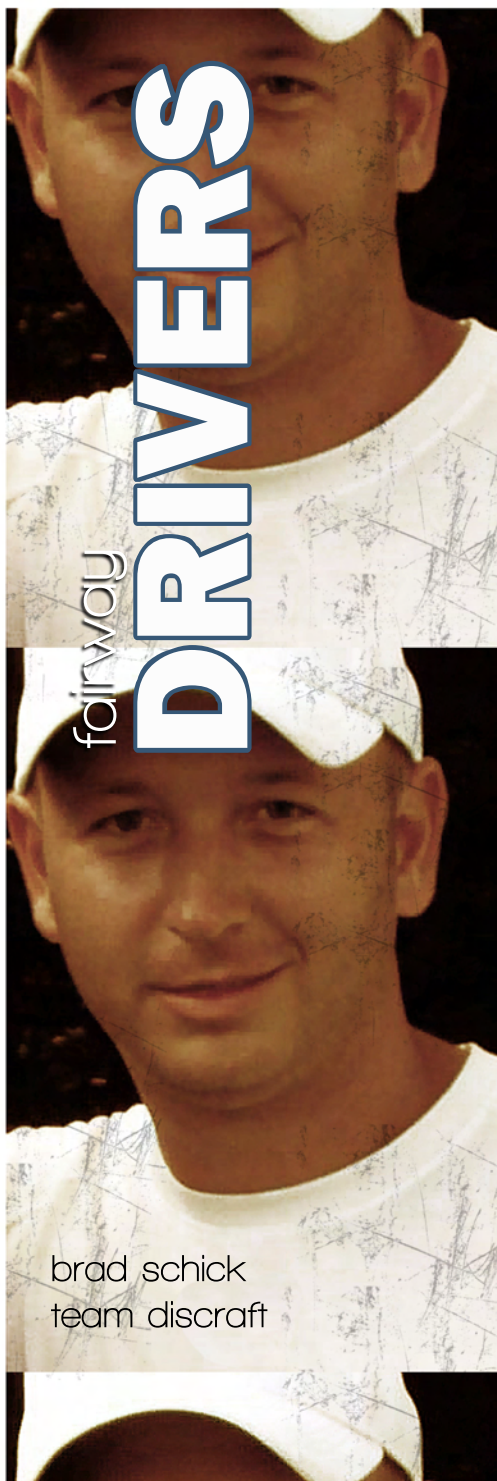

PREDATOR

CLASS: FAIRWAY DRIVER

STABILITY 2.5 MAX WT 174

Predator is our most predictable overstable driver. It holds a line in the wind, or turns a hyzer corner at medium speed. Highly valued for its unwavering consistency. Check a top pro's bag, and chances are good you'll find a Pred!

brad schick
team discraft

CYCLONE

CLASS: FAIRWAY DRIVER

STABILITY 0.0 MAX WT 176

A legendary driver. In the mid-90s, the Cyclone ruled the tee, and ushered in the era of golf drivers made from high-tech engineered polymers. It's easy to control whether you're going straight, hyzer or anhyzer. A disc golf standard.

XPRESS

CLASS: FAIRWAY DRIVER

STABILITY 0.0 MAX WT 174

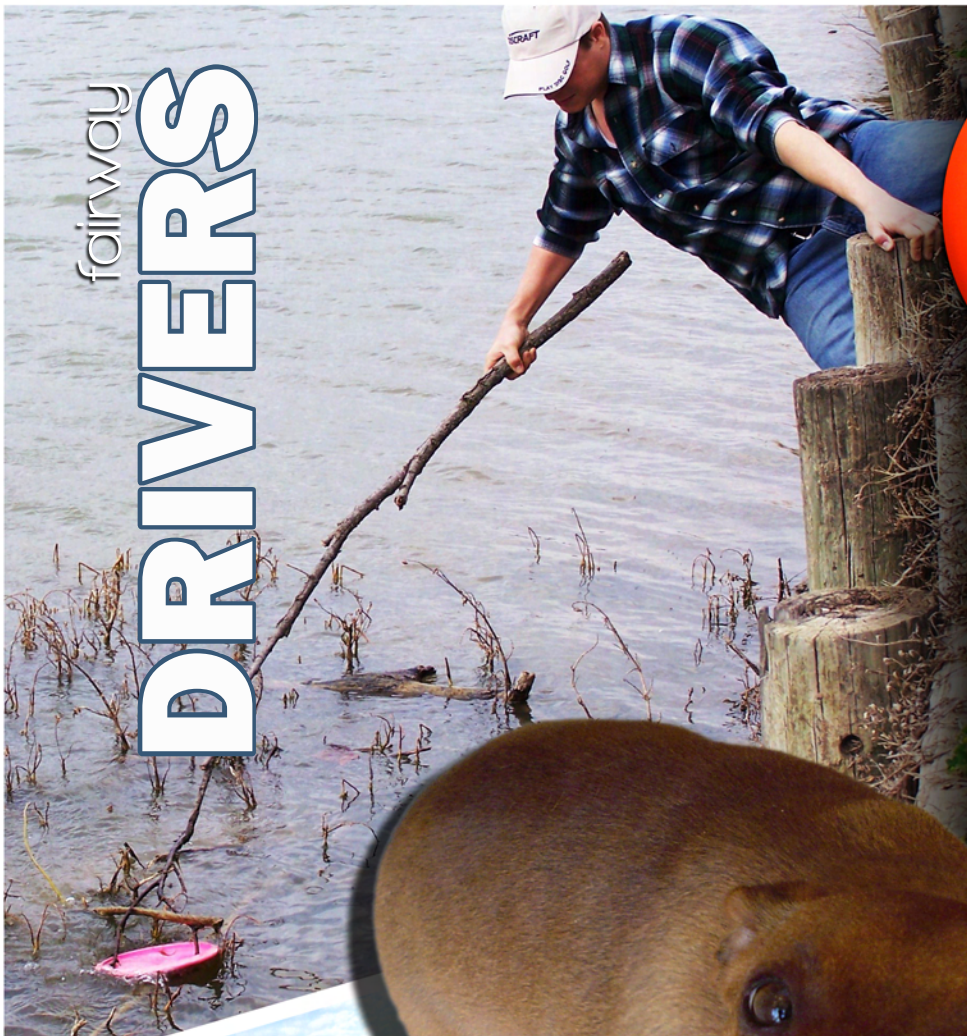

Reach for Xpress when you need to throw a long, slow anhyzer. Xpress will hold your turnover line and keep on gliding. Great for rollers and hyzer flip-to-straight shots too.

X XPRESS: STABILITY -1.0, MAX WT 174

GLIDE

CLASS: FAIRWAY DRIVER

STABILITY -0.5 MAX WT 177

Great for beginners and pros too, Glide is easy to throw... and just keeps going! Grab a Glide when you need a little more controlled distance, or a long turnover driver.

STRATUS

CLASS: FAIRWAY DRIVER

STABILITY -1.0 MAX WT 176

Stratus is one of the best for slow, controlled flights. Easy to throw, it will fly straight at low to mid speeds, or fade to an anhyzer at higher speeds. A well-worn Stratus will flip flat when thrown on a hard hyzer. Try it for roller shots too!

MIDRANGE

michael johansen
team discraft

METEOR

CLASS: MIDRANGE DRIVER

STABILITY -0.5

MAX WT 178

The Meteor fits nicely into our midrange lineup, delivering steady, controlled turnovers with a lot of glide... even at slower speeds. Or release it at a seven o'clock angle for a nice smooth hyzer.

HAWK

CLASS: MIDRANGE DRIVER

STABILITY 0.0

MAX WT 175

Hawk is the midrange of choice for 3x World Champ Nate Doss. An excellent all-purpose mid that is especially handy on tight fairways. A straight flier out of the box, it's a perfect first choice for new players.

COMET

CLASS: MIDRANGE DRIVER

STABILITY 0.0

MAX WT 180

When you need to go 300 feet on a lazer line, reach for Comet. The legendary Comet is a super accurate, straight flying approach disc that has been called the best golf disc ever. Holds whatever line you throw it on.

BUZZZ SS

CLASS: MIDRANGE DRIVER

STABILITY 0.0 MAX WT 178

Previously available only as a fundraiser, Buzzz SS is now a standard release by popular demand. Flies like a well-seasoned Buzz right out of the box! Super smooth for buttery anhyzers, a must-have for all Buzzz fans.

BUZZZ OS

CLASS: MIDRANGE DRIVER

STABILITY 1.7 MAX WT 178

When you're facing a headwind, need a straight shot with a hard finish, or want to use a forehand throw, Buzzz OS delivers success. Plus it's beadless; it feels like a Buzzz in your hand, lending that familiar Buzzz confidence!

MINI BUZZZ

CLASS: MINI MARKER

STABILITY 0.5 MAX WT NA

Mini Buzzz has taken the world by storm. At approximately 62 grams and about six inches across, it's larger and heavier than your standard mini. Looks awesome, flies great and always provides a ton of fun!

BUZZZ

CLASS: MIDRANGE DRIVER

STABILITY 0.5 MAX WT 178

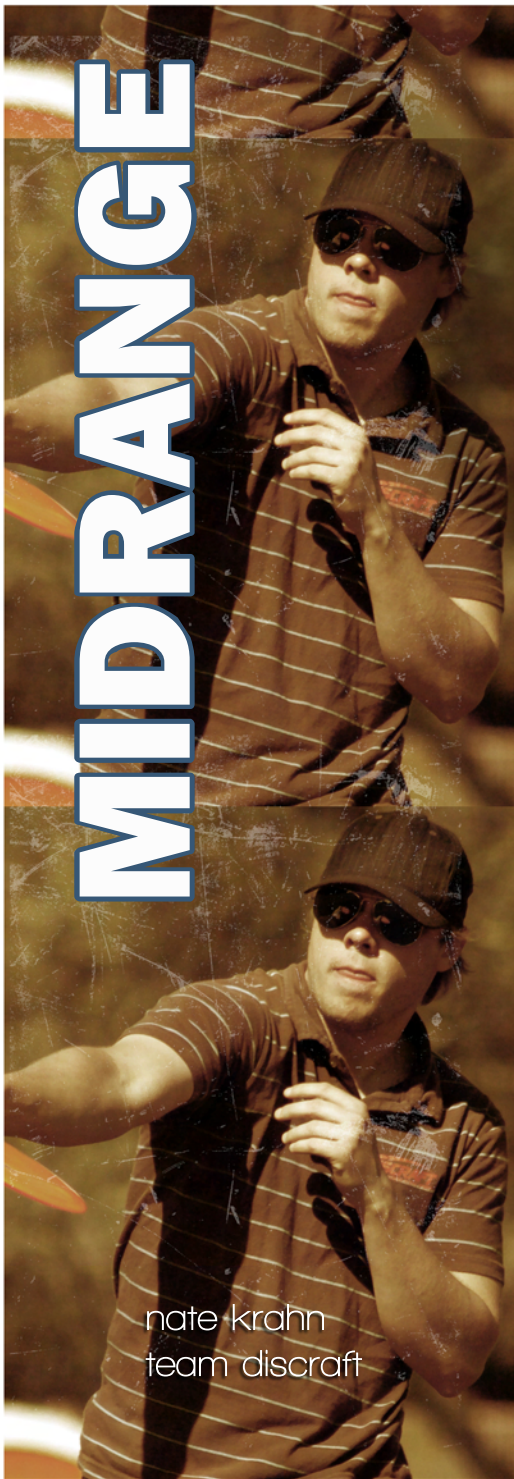

More players agree: Buzzz is the best golf disc you can buy, period. It's an ultra-dependable, straight flying midrange that you'll reach for again and again. Throw it hard and versatile Buzzz will hold any line you put it on.

The world's most popular golf disc.

MIDRANGE

nate krahn
team discraft

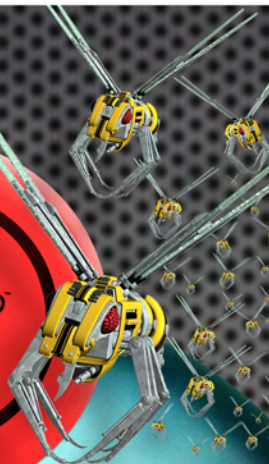

WASP

CLASS: MIDRANGE DRIVER

STABILITY 1.5

MAX WT 178

Take the sting out of your next moderate headwind approach with a Wasp. Superbly consistent flight characteristics for shots in the 250-350 foot range, you'll want one for windy days or mild hyzer finishes.

DRONE

CLASS: MIDRANGE DRIVER

STABILITY 2.6

MAX WT 178

Our friends in windier places love the Drone like no other midrange for its ability to fight any headwind and not turn over. Slow and very overstable, Drone is best for advanced players and forehand approaches.

MINI REVOLUTION

Our new over-sized minis have created a completely new class of fun and throwable golf discs with amazing distance potential. Give one a rip and you'll be addicted too!!

putt and approach discs PUTTERS

ROACH

CLASS: PUTT AND APPROACH

STABILITY 0.0 MAX WT 174

A straight flier with extra glide, the Roach™ is crafty in avoiding danger while incessantly pursuing chains. Just point and shoot. Originally the 2015 Ace Race disc, it's beadless too and feels great in the hand. Try a Roach on your next approach!

MAGNET

CLASS: PUTT AND APPROACH

STABILITY 0.0 MAX WT 175

The Magnet is our flagship putter, and is used by thousands of seasoned disc golfers. Not too hard, not too soft... it goes in and stays in. Use as your utility putter of choice and it makes a superb short range driver and approach disc too.

ALSO AVAILABLE IN PRO D 150 CLASS

SOFT MAGNET

CLASS: PUTT AND APPROACH

STABILITY 0.0 MAX WT 175

BEST SELLER! Soft Magnet is specially engineered for players who love the Magnet but prefer a softer putter that grabs the chains. It's more tacky than floppy, with good grip for consistent release every time

RINGER

CLASS: PUTT AND APPROACH

STABILITY 1.5 MAX WT 174

Ringer is an excellent choice for an everyday utility disc. The combination of moderate overstab and low profile make Ringer a popular choice for approaches and putts alike in both calm and breezy conditions.

scott papa
team discraft

CHALLENGER

CLASS: PUTT AND APPROACH

STABILITY 1.0

MAX WT 174

The legendary putter! Challenger is overstable and very popular with seasoned players. It can get around trouble for those long hyzer putts and is overstable enough to take a good amount of snap on approaches.

SOFT CHALLENGER

CLASS: PUTT AND APPROACH

STABILITY 1.0

MAX WT 174

Whether you're putting or throwing hard, Soft Challenger won't flip over in moderate winds. Players love the extra grip they get from Soft Challenger for a consistent release, putt after putt.

SOFT APX

CLASS: PUTT AND APPROACH

STABILITY 0.0

MAX WT 174

The APX rocks! Designed with a special elite plastic that allows for consistent release on crucial putts, it's just tacky enough for perfect grip, and sticky enough to grab the chains. It's perfectly stable too, so let 'er rip on short drives!

DISCRAFT

putt and approach discs PUTTERS

FOCUS

CLASS: PUTT AND APPROACH

STABILITY 0.5 MAX WT 174

This bullet-nosed brute fills a gap in Discraft's putter line up, being our only 0.5 putter. Focus will cut moderate winds on long approaches, and delivers pinpoint accuracy all the way to the chains.

SOFT FOCUS

CLASS: PUTT AND APPROACH

STABILITY 0.5 MAX WT 174

Soft Focus has everything you need for putting success: controllable flight at slow to medium speeds; a good feel in the hand, and the grip confidence you want on every trip to the chains. Try one... you'll agree.

ZONE

CLASS: PUTT AND APPROACH

STABILITY 2.0 MAX WT 174

Advanced players love the overstable, low-profiled Zone putter. Will hold the line without flipping on long approaches, and delivers predictable putts even in windy conditions.

DISCRAFT
JAWBREAKER
BANGER-GT

BANGER-GT

CLASS: PUTT AND APPROACH

STABILITY 1.0

MAX WT 174

Our Groove Top putter delivers consistency and confidence with every release. Banger is overstable enough to handle a headwind, won't turn over on long approaches, won't skip on fast greens. Tuck your thumb in and feel the GT difference.

SOFT BANGER-GT

CLASS: PUTT AND APPROACH

STABILITY 1.0

MAX WT 174

Meet your next putter. If the grip of your putter is important, consider these factors: grippy X plastic, grippy softness, and the grippy Groove Top, all rolled into one putter. One throw, and you'll be hooked!

RATTLER

CLASS: PUTT AND APPROACH

STABILITY 0.0

MAX WT 175

Straight is great! Rattler is a super accurate putt and approach golf disc. It flies slow, flat and ultra-stable to get you in close from 100 to 150 feet and let you nail more of those monster putts.

SOFT PUTT'R

CLASS: PUTT AND APPROACH

STABILITY 0.0

MAX WT 174

The Putt'r is an excellent turnover approach putter. It goes super straight at slower speeds, and feels great in your hand. The Putt'r has been referred to by some as the best putter ever. What will you achieve with it?

*Z FLX models
include Buzzz,
Buzzz SS, Buzzz OS,
Challenger, Crank,
Heat, Nuke, Nuke SS,
Nuke OS and Zone.*

Z FLX™

Unlike any other plastic available in disc sports... a Discraft exclusive!

Discraft has created the most amazing plastic in disc golf. It is engineered to retain its texture, form and grippiness in any weather. And its high durability Z base plastic guarantees your disc will hold and maintain its stability and flight characteristics over the years.

Z FLX provides players enough 'give' to allow you to dig into the disc for better grip in wet or cold conditions, yet has superb memory to snap back instantly on release.

Whoa... it glows!

The fun doesn't have to end just because the sun goes down. Glo golf discs will light up the night! Expose them to bright light for a few moments and you're ready to go!

All Discraft Glo discs are Z plastic. Available models include Buzzz, Avenger SS, Comet, Crank, Meteor, Nuke and Zombee.

Fly Dye™

Each fly dyed disc is hand-crafted and unique

Let your colors fly! Each Fly Dye disc is as unique as you are. These discs are intensely bright and are individually hand colored for a one of a kind look. It's truly the Cadillac of disc treatments that you'll enjoy for years. Available on all Z models.

Fly Dye models subject to change. See order form for current model availability.

Big Z Collection

Go big or go home.

Try something different to brighten up your disc golf bag: BIG stamps, standard molds, in a unique Big Z plastic! Big Z has all the durability of our popular Z line plastic, with a modest pearl quality added.

- available in assorted colors

SNAPBACK FLAT BILL (TWO TONE)

- acrylic/wool blend
- adjustable
- available in assorted colors

DISC GOLF TOWELS

It's a micro-cotton waffle weave that easily sheds debris when you give it a shake. It absorbs moisture well but is also thin so it doesn't take up a lot of valuable real estate in your bag. Dimensions: 24 x 14.5 inches, includes fabric hook loop.

DISCRAFT SPORTSACK

Absorbs hand moisture with no dust or residue buildup. Designed for disc golfers using exclusive Absorbead technology. Will work in any weather conditions.

CUFF BEANIE

40 gram Thinsulate Flex material embroidered with the Discraft logo on front. By Yuppoong.

BUZZZ BEANIE

This beanie by Yuppoong can help keep you focused in cold weather rounds. High quality, 100% acrylic. One size fits most.

WEEKENDER BAG

Holds 6 - 8 discs. Includes putter pocket, reinforced and padded shoulder strap, zippered and velcroed rain fly, water bottle pouch and zippered inner pocket. Discs sold separately.

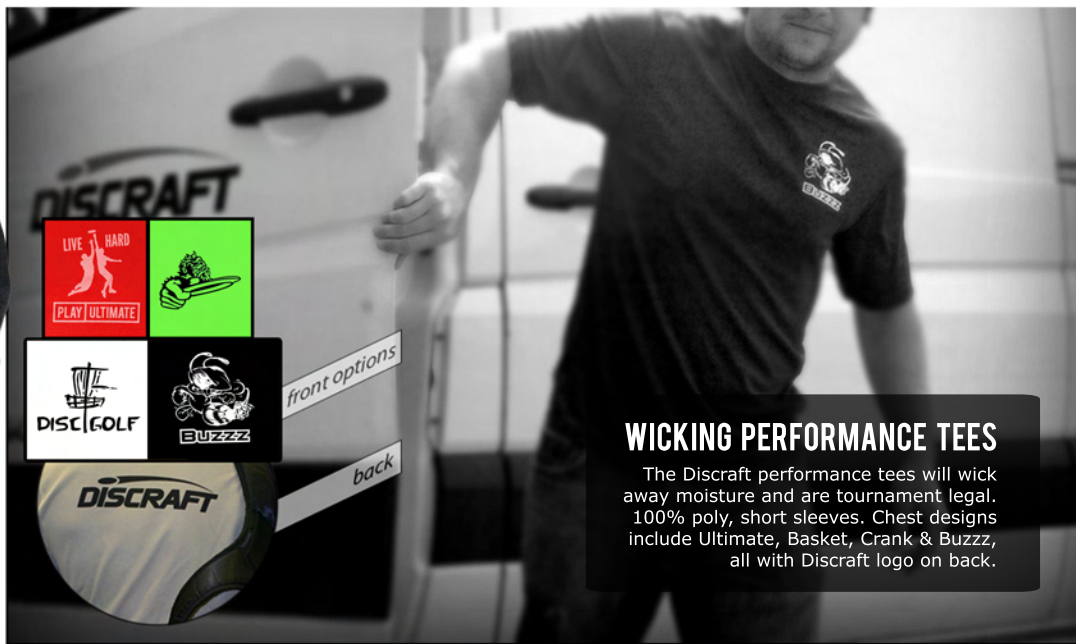

all accessories and many more available at

<http://discraftfactorystore.com>

TOURNAMENT BAG

Holds 12-14 discs plus the usual accessories. Quality workmanship, PVC bottom keeps moisture out. Includes removable liner that holds discs better. Quick-release velcro and zippered rain fly. Discs and other accessories not included.

WICKING PERFORMANCE TEES

The Discraft performance tees will wick away moisture and are tournament legal. 100% poly, short sleeves. Chest designs include Ultimate, Basket, Crank & Buzzz, all with Discraft logo on back.

CLASSIC CAP

A consistent favorite. High quality 100% cotton shell with sandwich bill and velcro strap adjuster for a perfect fit. Your choice of "Play Disc Golf," "Play Ultimate" or no embroidery on bill.

REUSABLE SCORECARD

Made of sturdy plastic, the score panel can be used over and over with pencil and eraser. Supports groups of up to six players and features a punch slot for attaching to the player's bag. The reverse side includes a complete Discraft disc golf flight guide.

DELUXE FOUR PACK SET

Includes two drivers, one midrange, one putter and a weekender bag. Models and plastics may vary. Display free standing.

BEGINNER THREE PACK SET

Our popular retail set includes a driver, midrange and putter. Displays via hook mount or can free stand.

RETAIL PACKAGING

Ultra-Star deluxe box with hook mount. Retail bag with hook mount header available for virtually all our discs.

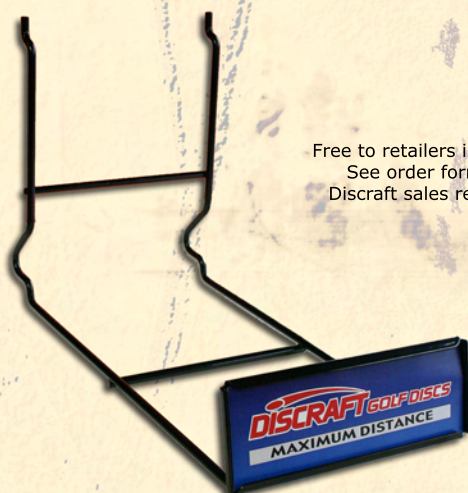

RETAIL DISPLAY RACK

Complete display rack holds approximately 150 discs, and can be free standing or wall-mounted. Comes fully assembled and ready to use out of the box. Discs sold separately.

SINGLE DISPLAY RACK

This custom-designed disc rack will work on most any retail display surface, including pegboard, slatboard and wire gridwall. Holds 12-16 golf discs or 8 Ultra-Stars. The upright design keeps discs in better, and allows more product per square foot while still allowing customers to pull a disc from the back without disturbing items above. Comes with display cards by class that are interchangeable as your inventory changes. Center bar keeps discs from sliding or falling out when stock gets low.

POP POSTERS

Free to retailers in most cases. See order form or ask your Discraft sales representative.

CHAINSTAR BASIC

Includes top chain assembly,
Trapper basket and mounting pipe.

CHAINSTAR REMOVABLE

Basic setup plus ground sleeve and
locking collar assembly for easy
removal. Add additional ground
sleeves for multiple target positions.
Our most popular option.

CHAINSTAR STAND MOUNTED

Basic basket plus wheeled metal
base for easy set up of target
practice, temp courses and special
events. Moving is a snap.

SUPERIOR DESIGN

1. Sliding chain mechanism allows
chains to 'give' for fewer bounce outs.

2. Inner chains are staggered to
seriously reduce cut-through by giving
the disc more links to hit.

3. The welding and design of the
Trapper basket is configured to make
sure the disc hits the bottom of the
basket and stays there.

Welcome to
